

As with previous editions held in Rome and New York, the 2-day event will include 14 key speakers from Jaguar Land Rover, Samsung and EEF to name a few. The programme is arranged over the 2 days to allow delegates plenty of time to network and interact with the CEOs, owners and senior managers of foundries and specialist foundry supply businesses. It is a highly focussed programme aimed at giving an important vision and insight into the development of the industry, combined with a gala dinner and plenty of social time for delegates and their partners.

Attended last time by over 120 key individuals and sponsored by 20 companies, the World Foundry Summit in 2025 will be equally as good if not better. To get a feel for the event please watch the video taken during the summit in New York scan this QR code
